

# Women in Healthcare: Leaders Advancing Access to Care

German Chambers Economic Forum

Tisha Boatman  
Manila, March 2025

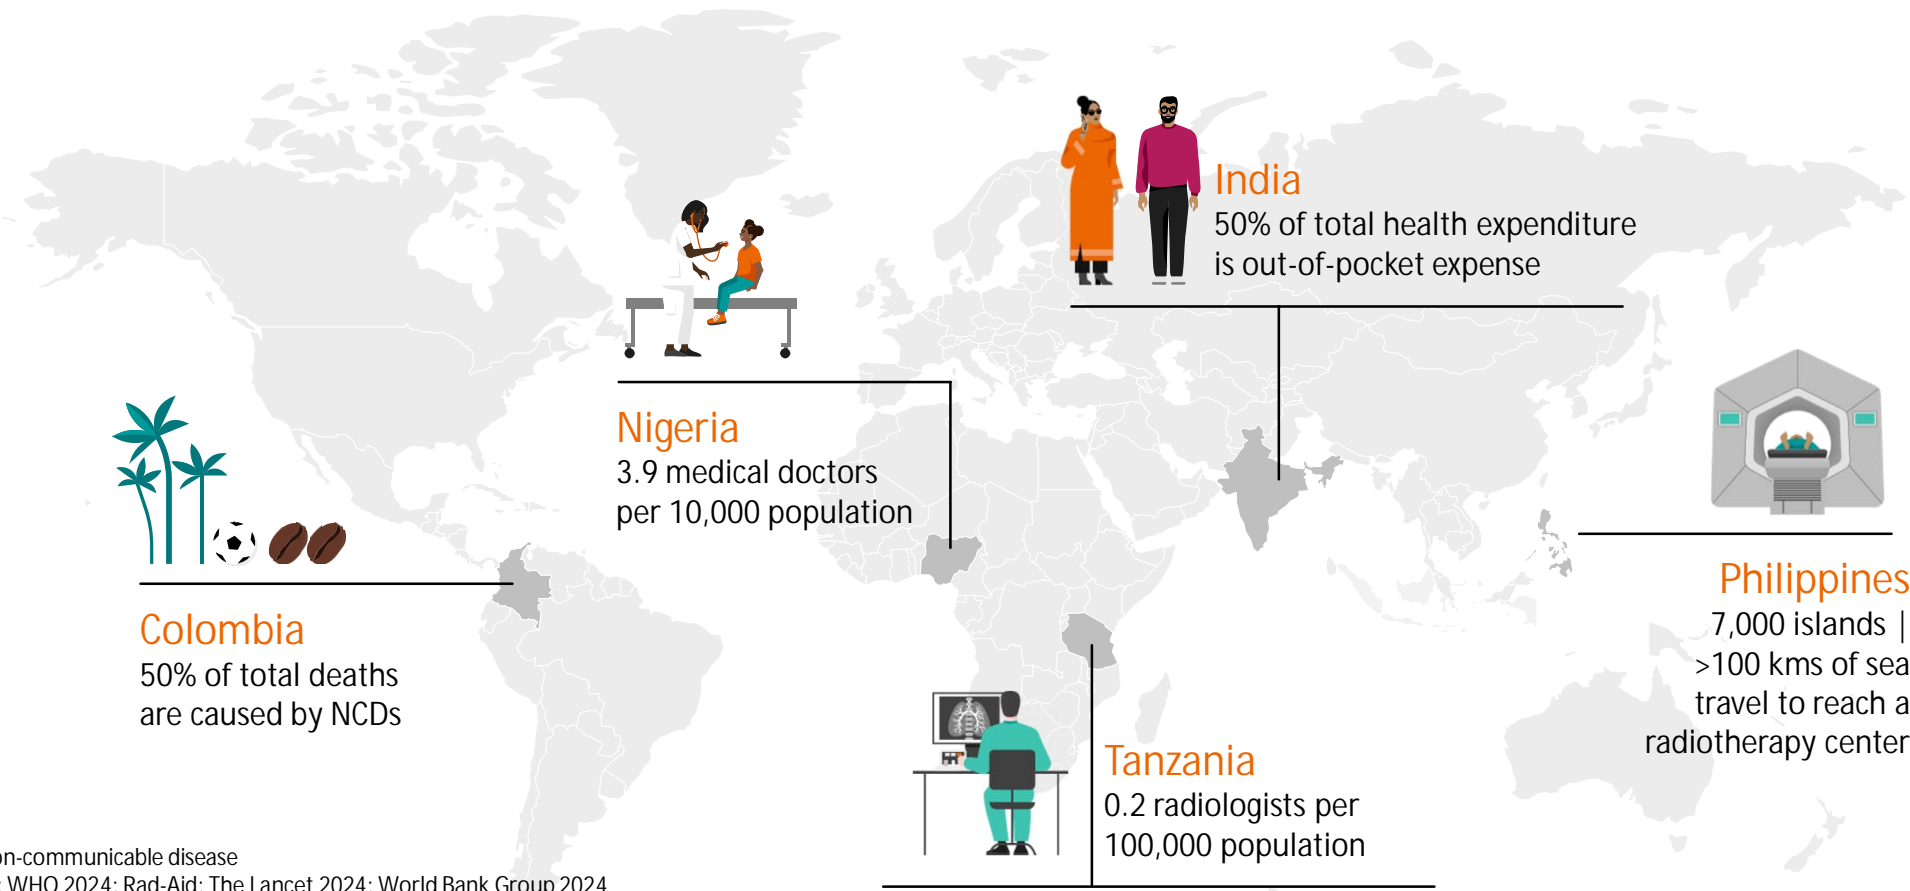

“ More than half of the world's population is still not covered by essential health services.

# Healthcare systems in low- and middle-income countries face multiple challenges

NCD: Non-communicable disease  
Sources: WHO 2024; Rad-Aid; The Lancet 2024; World Bank Group 2024  
Vergara, T. V. T., et al. (2024). Radiation Oncology in the Philippines: Current State and Future Directions. *Advances in Radiation Oncology*, 9(2), 101354-.

# Improving women's health has positive economic outcomes

# Non-communicable diseases are leading cause of deaths in women globally

35%

of all deaths in women are caused by CVD.

80%

of breast & cervical cancer deaths occur in LMICs.

A maternal death occurred every **two minutes** in 2020.

**One** in every 10 women between the ages of 15 and 45 years is affected by endometriosis.

We pioneer  
breakthroughs  
in healthcare.

For everyone.  
Everywhere.  
Sustainably.

# Our Commitment

## HEALTHCARE ACCESS

### Patient impact

1.25 billion patient touchpoints in LMICs by 2030  
Expanding to patient impact in underserved communities globally

### Healthcare workforce education and training

6 million hours of training provided by 2030

## RESOURCE PRESERVATION

### Net zero

90% reduction in Scope 1 & 2 emissions by 2030 <sup>1)</sup>  
28% reduction in Scope 3 emissions by 2030, 90% by 2050 <sup>1)</sup>

### Circularity

Increase share of circular revenue by 2030

## DIVERSE AND ENGAGED HEALTHINEERS

### Diversity

30% women representation in Senior Management roles by 2025 <sup>2)</sup>

### Employee engagement

Maintain Top Quartile employee engagement score

### External recognition

“Great Place To Work” in countries representing >80% of employees by 2025

Volunteering and Employee-led initiatives

Global and Regional Partnerships

1) vs. baseline 2019    2) In addition: adherence to country-specific legal requirements    3) Eligible circular revenue according to EU Taxonomy criteria

# Pioneering breakthroughs to make healthcare more accessible and affordable for patients everywhere

## Driving healthcare breakthroughs

Advanced technology and AI to democratize healthcare and overcome barriers in low-resource settings

Collaboration to align resources, transform the system of care, and build ecosystems that benefit patients

## Empowering the workforce

Education and training of healthcare professionals to offer high quality patient care

## Expanding patient impact in underserved communities globally

### Early diagnosis

Screening and diagnostics for early insights to manage disease more effectively

2 million diagnosed through Aarthi centers annually, India

### Comprehensive care

Optimized clinical pathways for the most threatening diseases to improve outcomes

30% faster stroke treatment for Catalonia, Spain

### Education and training

Extended and qualified workforce to expand healthcare access

63 trained staff deliver 72,000 procedures annually, Tanzania

## Leveraging global and regional partnerships

# We are partnering with leading organizations for better health outcomes for women

# We are addressing the gender health gap in underserved communities

Enabling mass breast cancer screening for over **30,000 women** in Indonesia, supported by AI

Bringing MRI to **>9 million Brazilians** in Pernambuco, the state with poorest basic health coverage

Deploying 28 X-rays with AI to address high TB burden in Uganda that affects **>90,000** people annually

Training **~300 mammography technicians annually** as part of Women's Health initiative in Egypt

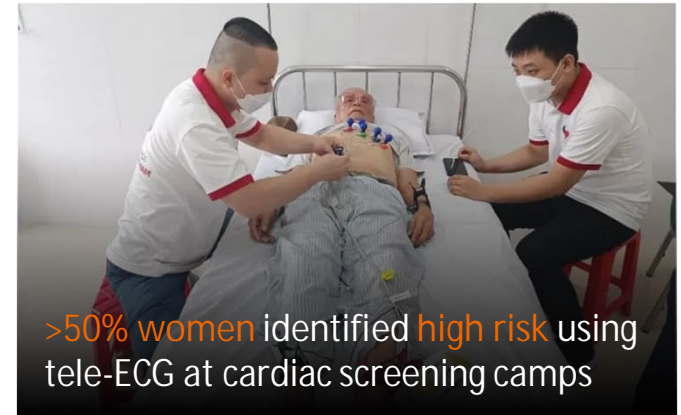

# In the Philippines, we are providing essential and advanced services to make healthcare more accessible

Catering **20,000** inhabitants of **isolated** Batanes island with radiology systems

**>200** mobile X-rays installed across the country as **Pandemic** response

**>50%** women identified **high risk** using tele-ECG at cardiac screening camps

**Comprehensive cancer care** center and **hub & spoke** model with AC Health

# Siemens Healthineers has become a valued partner of DOH for training and education

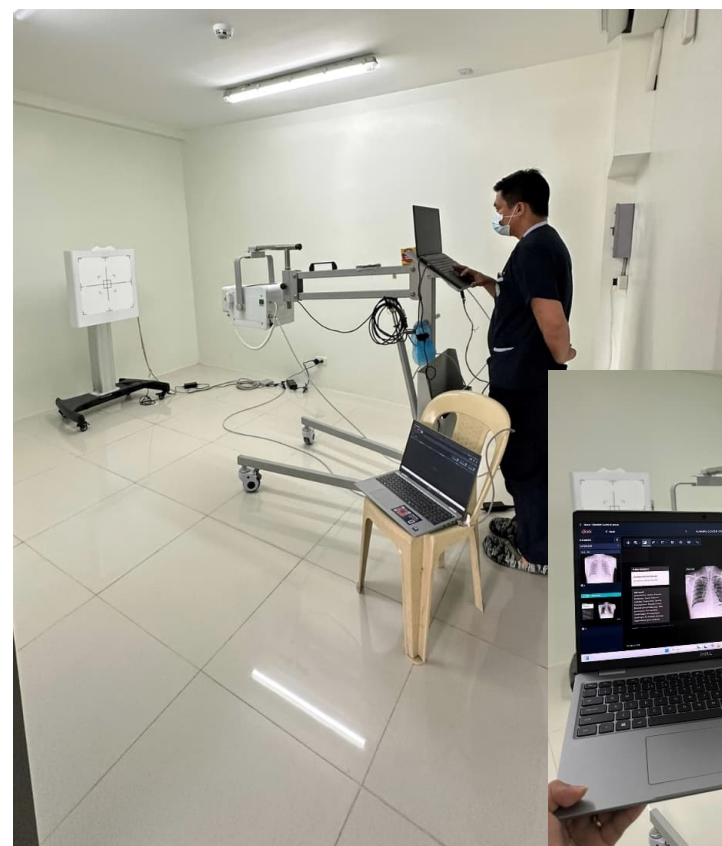

## Three Letters of Intent signed

Reinforcing commitment towards development of the healthcare sector

- Developing a training center at a partner hospital
- Developing an Innovation Think Tank hub and spoke model
- Explore opportunities for strategic and digital partnerships

# Adopting artificial intelligence to diagnose Tuberculosis in the Philippines

# We aspire to create better outcomes and experiences for patients, no matter where they live

## Fighting the most threatening diseases

- Addressing the needs of LMICs<sup>1</sup>
- Providing end-to-end solutions from screening, diagnosis, therapy to follow-up

## Rethinking the value chain

- Providing flexible financing solutions
- Customizing education & training offerings
- Leveraging the strength of global presence
- Closing local capacity gaps

## Building strategic partnerships

- Developing long-term partnerships to improve access to care
- Bridging the existing gaps of affordability and availability

## Accelerating global development

- Supporting UN Sustainable Development Goals as our commitment to Sustainability
- Driving initiatives to strengthen healthcare systems

<sup>1</sup> Low- and middle-income countries

Thank you!
